SUMMARY

To secure a Full Stack or Frontend Developer role in a dynamic, growth-focused tech team where I can apply my skills in React.js, Node.js, MongoDB, and RESTful APIs to build performant, scalable, and user-centered web applications.

WORK EXPERIENCE

Associate Software Engineer – AgreeYa Solutions, Noida Jan 2024 – Present

- Developed and maintained scalable web applications using MERN stack.
- Designed and implemented Keka Clone for internal HR and payroll management.
- Built Project Practice Management tool using MERN stack for tracking tasks, projects, and team productivity.
- Integrated secure authentication and role-based access control using JWT and bcrypt.
- Collaborated in an Agile environment using Scrum methodology to deliver sprint-based features.
- Performed API development with Node.js, Express.js, and MongoDB including CRUD operations and data validations.
- Optimized performance by implementing caching strategies and query optimizations.

Web Developer Intern – Bharat Intern (Remote) Oct 2023 – Nov 2023

- Developed responsive UIs using React.js and Tailwind CSS.
- Integrated and debugged REST APIs with clean state management using Zustand/Redux.
- Collaborated in a 5-member Agile team to deliver web modules within sprint timelines.
- Used Git and GitHub for version control and pull request workflows.

PROJECTS

Budget-Wise – AI Finance Manager [Live Demo](#) — [Code](#)

Designed and developed an AI-powered finance manager using MERN stack, OpenAI API, and Tesseract.js. Features:

- Users can upload receipts (OCR via Tesseract.js) and log transactions using voice input.
- OpenAI used for smart expense categorization.
- Real-time budget calculations and responsive design.

Real-Time Multiplayer Chess Game [Live Demo](#) — [Code](#)

Built a fully functional online chess game with real-time gameplay using JavaScript, Socket.io, and Node.js.

- Implemented WebSockets for instant move updates across clients.
- Added win detection, player turn management, and responsive UI.
- Deployed on Vercel with optimized socket connections.

Next Real Estate Platform

[Live Demo](#) — [Code](#)

Developed a real estate platform using React.js, Node.js, Express, MongoDB. Features:

- Property listing, search, and filters with SEO optimization using Next.js.
- User authentication, property creation/editing, and detail pages.

Product CRUD API

[Code](#)

Built a backend-only RESTful API using Node.js, Express.js, and MongoDB for managing product records with:

- Full CRUD operations, route validation, error handling.
- Tested endpoints using Postman for future frontend integration.

Keka Clone (AgreeYa Solutions)

Internal Project

Developed a Keka-like HRMS using MERN stack.

- Features: Employee onboarding, payroll management, leave tracking, role-based access.
- Integrated secure authentication (JWT), dynamic dashboards, and MongoDB aggregation for reports.

Project Practice Management (AgreeYa Solutions)

Internal Project

Built a Project Practice Management System using MERN stack.

- Allows project creation, task assignment, progress tracking, and reporting.
- Implemented authentication, admin dashboards, and real-time updates.

CERTIFICATIONS

Node.js (Basic) – HackerRank

Software Engineering Intern – HackerRank

Digital Skills – Accenture

Software Engineering Job Simulation – Goldman Sachs (Forage)

Introduction to APIs – Great Learning

Generative AI Fundamentals – Google

Intro to Generative AI Studio – Google

Mobile Debugging – NTMS Training Institute

Content-Led SEO – Semrush
