

NAME OF THE CANDIDATE**DESIGNATION**

(Note: Write a brief about your experience and expertise in not more than 8-10 lines. Key words and skills should be in bold. The following shows an example. Remove this note from your resume)

XXXX is an astute professional with around **11+ years'** of qualitative experience in the areas of **Architecture designing, Implementations, Project and Program Management**. Amit comes with vast exposure in Client handling and Onsite Coordination in offshore and onsite delivery model. He has expertise in **Microsoft SharePoint Technologies** in terms of Content Management and Collaboration, **Enterprise Portals, Business Analytics**, etc. and CRM / ERP Implementation, Application Development & Integration. Amit is primarily handling independent SharePoint Implementations and Application Development activities along with Database Administration (in SQL Server) including requirement analysis, design, development, testing, troubleshooting, implementation and database installation & disaster recovery management.

Professional Expertise

(Note: Mention key skills in bullet points, highlight any important word by making it bold (as shown hereunder). Remove this note from resume)

- Experience in MVC3/4 Framework and implemented projects successfully using ASP.NET MVC3/4 Razor engine.
- Experience in e-commerce based application development and integration of web based application with payment gateway systems like World pay.
- Experience in designing **SharePoint Information architecture**, taxonomy and in using SharePoint as an application framework.
- Hands on experience on **SharePoint Designer 2007 & 2010** and InfoPath 2007/2010, Backup Restoration and recovery Procedures.
- Experience in **SharePoint lists, libraries, web parts, CAML queries, creating features, solutions, publishing features, site definitions, custom content types, etc.**
- Experience in leading team of developers and onsite-offshore team coordination with effective communication skills.
- Experience in implementing projects using **Agile Scrum methodology** with Sprint based delivery with TDD development based approach with Mocking frameworks (Moq, Rhino Moq), Unit Testing tools like MS Test.
- Have good experience in developing n-tier large scale enterprise level applications using Agile Scrum methodology and following Sprint based delivery with daily Scrum meetings, and good experience in implementing Dependency Injection, IOC and Design Patterns.
- Experience in modeling a system using UML with Use Case Diagrams, Class Diagrams, and Sequence Diagrams and strong in object oriented concepts and object oriented analysis and design (OOAD).
- Implemented development projects in continuous integration environment with tools like **Team City** and project management tools like **JIRA**.
- Experience in development of **SOA architecture** based applications with WCF and REST Full.

- Good in database programming skills and strong in writing **SQL Server Queries**, Stored Procedures, UDF's, Triggers ,Indexes etc.
- Have the strong ability to do tasks in multiple projects and equipped with strong analytical skills.
- Have good experience in providing technical solutions to business requirements and strong experience in customer/client facing business environment.
- Good team player can work in team as well as individually with no supervision and provide high productivity with high confidence.
- Have experience in Leading the team of developers and accountable for deliverables.
- Strong experience in providing stable, robust, clean, commented and maintainable code.

(Note: Mention key skills in similar boxes as shown hereunder. Remove this note from resume)

SQL Server 2005/2008/ 2012 R2, SQL Server Integration Services(SSIS), Informatica	Cognos 8 BI Report Studio, Cognos 8 BI Analysis Studio, Cognos 8 BI Framework Manager, Cognos 8 BI PowerPlay,
SQL Server Analysis Services(SSAS)	Cognos 8 BI Metrics Manager, Cognos 8 BI Metric Studio, ReportNet
SQL Server Reporting Services (SSRS),	
HTML, DHTML, XML, CSS, ASP, Front Page 98/2000	VB Script, Java Script, ASP.NET, PHP, PERL

EDUCATION/TRAINING/CERTIFICATION

(Note: Mention degree, institute that awarded it, duration of the course and the year of award of degree. Similarly for training/certificate provide all the affiliated details (as shown hereunder). Remove this note from resume)

EDUCATION:

- Bachelor of Technology in Computer Science and Engineering, JNTU Hyderabad India, 2000
- Master of Science in Information Technology, University of East London, 2012

TRAINING/CERTIFICATION:

- Exam 70-667: **Microsoft Certified Technology Specialist (MCTS)**, SharePoint 2010, Configuration
- Exam 70-668: **Microsoft Certified IT Professional (MCITP)**, SharePoint 2010, Administrator

TECHNICAL ENVIRONMENT

(Note: Mention details as shown hereunder. Remove this note from resume)

Languages:

C#, VB.NET, Java

Web Technologies:

.Net Framework 4.0/3.5/2.0,ASP.NET, MVC3, nhibernate, Entity Framework, ADO.NET, LINQ, ASP3.0, COM, VBScript, nInject, JavaScript, JQuery , Knock out JS,LINQ, Lamda, Ajax, CSS, HTML, WCF, Web Services and XML

CMS:

Episerver 6.0, Share Point 2010/07

Reporting Tools:	SSRS 2005, Crystal Reports
UML Tools:	Rational Rose, Visio, EDraw
Web Servers:	IIS 7.0
Integration Tools:	BizTalk 2006/04
RDBMS :	SQL Server2008R2/2005, Oracle, Informix
Source Control:	Sub Version, VSTF and VSS
IDE:	VisualStudio.NET2010/2008/2005, TOAD
CI Tools:	Team City, Cruise Control

MAJOR ASSIGNMENTS

(Note: Mention your project details (as shown hereunder), in the same format – Name of Employer, Client, Project start and end month & year, Project Name and your title(role), followed by a brief of what was the project about and then your role and responsibilities on this project. Last section of each will follow the technical environment details for the project. Similar details will follow for all project assignments. Remove this note from resume)

Employer: Silicon Tech Solutions Limited

Client: Tesla Motors Inc

Mar 2014– Present

Project: Warp Logistics

Role: Senior .NET Developer

Warp Logistics is internal web based application for Tesla Motors Inc. to maintain shipment and carrier details. This application is integrated with FedEx web services for shipment.

Responsibilities:

- Developing various pages of applications using MV43 Razor, C#, Entity Framework, Ajax and JQuery and UI dialogue with TDD and unit testing.
- Designing database schema and writing stored procedures, functions, views on back end with SQL Server.
